

Beyond Foreflight: New Useful Web Sites for Instrument Pilots

Some of the best Web sites and Internet tools for weather and flight planning aren't available on the Ipad! In this seminar, you'll learn how to: See the exact maps an FSS briefer sees; * Automatically get a text if the weather changes; * Plan routes that get you "cleared as filed"; * Find additional sources for winds aloft, freezing levels, temp/dewpoint spread and more. Following the seminar, attendees may participate in the first-ever meeting of the new IMC Club ABQ chapter...your chance to network with and learn from other instrument pilots.

Directions: South side, Albuquerque Sunport

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafetyTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
